

BLACK™ ICE

BOOST AND DISTORT

Battery-Free, On-Board Modules

Visit us at Hall E Booth 1641

Grab and Go: Your guitar's controls are essential for quick, on-the-fly adjustments. Why not have the same fingertip access to a high-quality 3-stage clean boost... or a little extra dirt?

No battery needed: Never. Ever.

Just a little, or a little more: Choose 3 different levels of boost (2, 4 or 7db).

Fat sound for skinny pickups: Humbucker-esque tones with standard single coils. Also a great kick in the pants for J bass, PAFs, P90s and other pickups.

Clean or dirty: Use as a clean boost or pair it with our Distort module for additional dirty boost options.

Because yes, it really does work:
We know... it sounds like scamboogery... but our battery-free module truly does generate up to 7db of active-like boost. It's why **Guitarist Magazine** gave it their **Guitarist Choice** and **Gear of the Year** awards.
